## Guidance for Veterans: Anaplastology Services Through Your Local VA

Medical Art Prosthetics, LLC (MAP) has provided specialized anaplastology and prosthetic services to VA hospitals across the United States since 1985.

Our highly skilled and dedicated anaplastologists deliver lifelike facial and body restorations—services that are no longer available through many local VA Prosthetics Departments. As a result, VA prosthetics teams nationwide routinely refer veterans to MAP as a qualified vendor and practitioner for advanced anaplastology care.

If you require restoration of the eye, nose, ear, finger, hand, foot, or other anatomical structures, MAP can provide the specialized care you need.

## How to Receive Anaplastology Care with MAP

### 1. Contact MAP

Call our coordinator, **Sharissa Browning**, at **(608) 833-7002**. She will arrange a call between you and your anaplastologist/prosthetist.

### 2. Register with the VA Prosthetics Clinic

If you are not already registered, enroll with your local VA Prosthetic Clinic (available nationwide).

### 3. Request Your Service

Attend your VA prosthetics appointment and formally request the anaplastology service you require (e.g., eye, nose, ear, finger, hand, or foot restoration).

## 4. Choose Your Provider

**Important:** If you are service-connected, you have the right to choose your provider. During your VA visit, clearly state that you are requesting **Medical Art Prosthetics (MAP)** for your care based on your unique medical history and needs.

## 5. Share MAP Information

Provide the VA prosthetics team with MAP's contact information or a copy of this guide to support the referral process.

## Administrative Process

MAP will keep you informed of progress with weekly updates. Once authorization is received, we will promptly begin scheduling your visit.

## Your Clinical Visit

Your local VA will assist with travel arrangements and accommodations for your clinical visit. MAP will also provide guidance and will expedite your care whenever possible. In many cases, prosthetic services can be completed within a few days, minimizing the length of your stay near our treatment location.

## Our Current Treatment Locations:

Chicago, IL  
Los Angeles, CA  
Madison, WI

Memphis, TN  
Oradell, NJ  
Rochester, NY

San Francisco, CA  
Tampa, FL
